

Document Vault and Sharing

Stay *organized*. Stay *prepared*. Stay in *control*.

Life brings important decisions, documents and details. Keeping track of all this information is stressful – and it can be time-consuming and overwhelming to search for it.

Your legal insurance plan includes access to a secure digital vault where you can organize, protect and share important information – such as legal documents, insurance policies, financial records and medical details – all in one place. You can feel confident knowing your critical information is organized, secure and accessible when you need it.

Secure Storage for Life's Essential Documents

A secure vault is your private, encrypted space for storing your most important life information. Only you and the people you explicitly choose can access it when needed. From wills and medical records to financial details and digital assets, everything is securely organized in one place. Access to the vault is protected by your secret code, known only by you.

Controlled Access for the People You Trust Most

Invite trusted individuals, such as family, advisors and executors to your circle for controlled access and collaboration. You can assign trusted contacts different permission levels, ensuring the right people have access to the right information when needed. It's a secure and organized way to involve loved ones while maintaining full control.

Smarter Support for Planning What Comes Next

Get personalized guidance from a private AI assistant that provides insights based on the information stored in your secure vault. It uses this context to support your decision-making, but your data is never shared or exposed. The assistant helps you understand what you have, identify gaps and think through next steps.

The document vault employs industry-leading security measures:

- Two-factor authentication
- Regular security audits and compliance checks
- Automatic timeout for inactive sessions
- Encryption for all stored documents

How Does it Work?

Members can access the document vault via a link when you log in to the online ARAG member portal. Once you create your account, you can upload documents, organize information, invite trusted contacts and use built-in tools to manage and review information over time – all in a secure, encrypted environment.
